LinkedIn: [linkedin.com/in/avivhauyn](https://www.linkedin.com/in/avivhauyn) || **Portfolio:** avivhauyn.com

Summary

Versatile Unity Developer with 3+ years of experience building and optimizing complete games and live systems. Strong focus on gameplay implementation, monetization, and backend integration. Skilled in C#, Unity, and AWS-based infrastructure. Combines hands on coding with systems thinking, bridging mobile analytics, economy design, and game logic for large-scale live operations.

Skills

Unity • C# • Firebase • Adjust • IronSource LevelPlay • AWS (Lambda, DynamoDB, S3) • Remote Config • Analytics • OOP • Shaders • Git • Problem Solving • Python • Async Coding

Experience

Freelance Unity Developer | 2024 - Present | Spark Games & more

- Developing and maintaining multiple mobile puzzle games built in **Unity 2022–2023**.
- Integrated and upgraded **Firebase (Auth, Remote Config, Analytics), Adjust**, and **IronSource LevelPlay** SDKs for cross-platform deployment.
- Collaborated on a custom **serverless backend** (AWS Lambda + DynamoDB + S3) handling wallet, offers, and postback logic.
- Designed secure **API workflows** for in-app purchases, rewards, and user balance synchronization.
- Refactored existing gameplay and UI systems and implemented new ones to work **asynchronously**, ensuring smooth operation with new API and data flows.
- Developing and optimizing physiotherapeutic games in Unity using Kinect and Femto cameras for motion-based interaction.

Unity Tutor | 2024 - Current | IAC College

- Teaching Unity, shaders, optimization, and art-tech workflows.
- Teaching C# and gameplay architecture; mentoring students on debugging and optimization.

3D Artist | 2021 - 2022 | Israeli Air Force

- Modeled, textured, and integrated 3D assets into real-time training simulations.
- Coordinated between art and programming teams to maintain visual fidelity and runtime performance.

Education

Unity Game Development & Design | 10/2022 - 10/2024 | IAC | Tel Aviv

Skills Developed: Gained expertise in C# development, object-oriented programming, designing engaging game mechanics, and intuitive UI systems.

Project Experience: Developed a complete game each semester. Worked in groups during the last two semesters. Responsibilities included designing and implementing game mechanics, UI, Shaders and more.
